**Visit the U.S. Army Acquisition Support Center Display, Booth #3707,  
at the 2007 AUSA Annual Meeting**

**Fort Belvoir, VA** — The U.S. Army Acquisition Support Center (USAASC) will exhibit at this year's Association of the United States Army (AUSA) Annual Meeting in Washington, D.C., Oct. 8-10, 2007. The USAASC booth will feature graphic panels detailing the U.S. Army Acquisition Corps' (AAC) and USAASC's mission responsibilities, skilled workforce and equipment acquisition process.

"It is clear that we have the world's best acquisition and logistics workforce serving a nation at war and a military force that is transforming while fighting and winning the global war on terrorism," remarked the Honorable Claude M. Bolton Jr., Army Acquisition Executive and Assistant Secretary of the Army for Acquisition, Logistics and Technology. "We have charted the right course – increasing capability, flexibility and sustainability – and we must maintain the tremendous momentum we have built."

Visitors to USAASC's booth will have an opportunity to learn about Army acquisition through an interactive kiosk display that features Army acquisition good news stories, interesting acquisition facts, a thought-provoking quiz and high-energy video. Stories highlighting recent acquisition developments, such as Counter-Measure Flares and the Light Command Post Platform, depict the necessary and influential role that the AAC plays in supplying Soldiers with the equipment they need in the field.

Acquisition professionals visiting USAASC's booth will also be able to discuss their educational and professional career goals with acquisition career management professionals, and will learn how training, education and experiential assignments can help them attain their career goals while better serving our Soldiers. Progress is being made every day to provide Soldiers the equipment and systems they require to sustain the most lethal, survivable, sustainable and dominant force on the modern battlefield.
