IDP Instructions

The Individual Development Plan / Continuous Learning (IDP/CL) is a critical document in which the employee and supervisor identify and track career objectives over a 5 year period in the areas of Education, Training and Experiential opportunities. Objectives should reflect overall broad career goals and specific development activities intended to accomplish them. The career goals should identify types of future positions desired, experience and training in other career fields, other education goals such as advanced degrees or a combination of all these. The developmental objectives should be attainable in reasonable time frames and do not have to be purely acquisition related. They can include items such as functional training, leadership education, professional activities and assignment experience that can lead toward the overall achievement of the broad career goals. The IDP is also the vehicle used to annotate, award, and track Continuous Learning Points (CLPs) in accordance with DOD [Continuous Learning Policy](#) and in accordance with the [Standard CL Cycle and Prorated CLPs Guidance](#).

Getting Started
