

## Appendix A: MILDEP's Intent and Vision Statement

**“Commander’s Intent:** The Army Acquisition Corps (AAC) shall transform itself in accordance with the Chief of Staff of the Army’s guidance, ***Transformation Road Map 2003***.

- ❖ To be successful in this endeavor we shall develop **DTLOMS-PF solutions** that fully integrate the AAC as a core capability within the Army and Joint Warfighting community, to include: validation as a Branch and/or a core capability; build of a Proponency and strategic alliances with G-3, G-4, and G-8, the Army Knowledge environment, the Training and Doctrine Command (TRADOC), Army Materiel Command (AMC) and the Army Logistics Enterprise, Defense Contract Management Agency (DCMA), Army Test and Evaluation Command (ATEC); and full participation and integration in common military decision making processes (MDMP) at the strategic, operational and tactical levels.
- ❖ The AAC shall develop flexible acquisition officers and civilian leaders that possess a diverse and well rounded background in the supporting functions and phases of acquisition, who are prepared to **lead** any complex, multi-functional acquisition command, agency, organization or team, supported by a functionally expert, relevant and ready workforce.
- ❖ The most notable result of the AAC Transformation will be a well-developed **core capability** in acquiring the **“M” in DTLOMS-PF, i.e., materiel, sustainment and service solutions** for the Current and Future Force, that possesses a joint, multi-agency, and multi-national footprint, with an equally critical mission to provide **full spectrum acquisition support** inserting those materiel and service solutions across the full spectrum of military operations.
- ❖ Included in this core Army capability are **all elements of the AAC workforce**, military and civilian, contractors on the battlefield, and in-the-zone industrial base participants.”

- **LTG Joseph L. Yakovac**
