2. Board applicants should provide the best possible electronic versions/scans of your documents. Board Members must be able to review your documents as clearly as possible. Group scan of your documents vs. individual document scan. Ensure you scan all documents in the order of the checklist (see website for checklist) and all documents are right-side up. If you elect to scan individual documents, ensure all documents are right-side up and named EACH file with what the document is.

3. The reclassification packet MUST have the correct and current contact information. If the packet needs an additional document, a corrected format or is missing a document or signature a member of the USAASC staff will attempt to contact you by phone or email the address provided. Based on the limited USAASC staff to review, consolidate and construct the Reclassification packets, multiple attempts to correct a submitted Reclassification packet are NOT possible.

4. In order to ensure the timely conduct of the USAR 51C NCO Reclassification Board, the below timeline applies:
