INTRODUCTION

HISTORY

On October 13, 1989, the Army Chief of Staff approved creation of the Army Acquisition Corps (AAC) to improve the quality of military and civilian acquisition specialists. At that time, the Secretary of the Army emphasized that the Army would intensively manage acquisition specialists to create a dedicated corps of acquisition leaders. The AAC received legitimacy in law with the November 1990 passage of the Defense Acquisition Workforce Improvement Act (DAWIA). This law mandated the establishment of an Acquisition Corps in each of the Services to improve the management, quality and professionalism of the Acquisition, Technology and Logistics Workforce.

LEADERSHIP OF ARMY ACQUISITION WORKFORCE

The Assistant Secretary of the Army (Acquisition, Logistics & Technology) and Army Acquisition Executive oversees the execution of the Army’s acquisition function. The ASA (ALT) Principal Military Deputy serves as the Director of Acquisition Career Management (DACM) responsible for ensuring career development and DAWIA certification (training, education and experience) across the AAW enterprise. The DACM has charged the U.S. Army Acquisition Support Center (USAASC) Army DACM Office to serve as an advocate for the Army Acquisition Workforce (AAW) instituting enterprise-wide acquisition career management for the civilian and military acquisition workforce.

LAYING THE FOUNDATION FOR OUR FUTURE

This Human Capital Strategic Plan (HCSP) establishes clearly defined goals, objectives and initiatives that complement an environment where the most capable acquisition professionals are challenged with the toughest jobs to support the fight, improve the force and build the future. The AAW HCSP provides direction to ensure the Army has the right acquisition human capital - the developers and program managers, the scientists and engineers, information technology and contracting specialists and other acquisition professionals - who are experienced, high-performing and committed to providing world-class capabilities to our Soldiers. Multiple acquisition stakeholders representing various commands and organizations, acquisition career fields, demographics, and generations were involved in the development of this HCSP.

This implementation plan will incorporate initiatives, measures, and best practices to achieve goals and close gaps.

To successfully plan and implement the HCSP, the governance structure will consist of:

<table>
<thead>
<tr>
<th>HCSP LEVEL</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Executive Steering Committee approves the HCSP and provides resource support</td>
</tr>
<tr>
<td>• HCSP Council develops and tracks progress of initiatives</td>
</tr>
</tbody>
</table>

<table>
