Program Management

Special Qualifications

- Ability to build functional teams and lead new capability development based on mission requirements
- PMP Certification or DAWIA certification in PM or related acquisition profession
- Masters degree preferred

Exchange Position Description (include a brief statement of how the goals of the assignment will be achieved)

Fill an impactful, strategic corporate role within the Booz Allen Hamilton structure and gain an understanding of the three primary elements of the Booz Allen business and culture: Corporate Solutions, Program Management, and Technical Solutions. Gain a unique understanding of Corporate Solutions by actively participating in the Booz Allen Culture, to include the corporate onboarding program; engage in and provide feedback on proposal creation; and develop an understanding of internal contracts. Refine Program Management expertise through detailed understanding and engagement in Booz Allen leadership and product delivery to address the needs of System Command (SYSCOM), Program Executive Offices (PEO), and Program Office level organizations; develop acquisition experience as it pertains to analysis and delivery of Acquisition Category I-IV level programs with focus on accelerating delivery through rapid, and innovative acquisition processes throughout the full programmatic life cycle. Explore Technical Solutions offered by the firm including rotations through focusing on Cybersecurity and the Booz Allen approach to Cyber Risk Management Framework; Digital Platform Solutions; and Artificial Intelligence/Machine Learning.

-Possession of excellent people skills

Exchange Position Description (include a brief statement of how the goals of the assignment will be achieved)
Join Booz Allen's Strategic Innovation Group (SIG) for a 6-month detail contributing to the development of differentiated functional offerings and breakthrough products and solutions. You will get a feel for the full breadth of our innovation business through four 6-week rotations, starting with our Solutions group where you ll collaborate with a team based out of our Innovation Center scouting new technologies and partnerships and supporting impactful, hands-on technical projects. You ll then rotate through three of our functional capability teams, collaborating on the development and marketing of differentiated service offerings within our Digital, Analytics, and Cyber functional areas.

This talent exchange will draw deeply from your technical background and mission expertise while providing enriching development opportunities around the latest disruptive technologies, alternative business models, and partnerships within the innovation ecosystem. All the while, you ll collaborate with a team of colleagues who are curious, motivated and passionate about the work we do.
