

Acquisition-Related Research Topics

FORM INSTRUCTIONS:

The Army Director, Acquisition Career Management (DACM) Office requests assistance in identifying research topics related to real world acquisition challenges. Proposed topics will be compiled and may be used in research papers by civilian/military scholars participating in Senior Service Colleges, Naval Postgraduate School, Defense Acquisition University-Senior Service College Fellowship, and Advanced Civil Schooling.

To submit an UNCLASSIFIED research topic, please download the pdf, fill out the fields below, and send the completed form to the Program Manager as listed in the respective site's contacts.

Examples of acquisition-focused research topics include:

- Is the Army acquisition community scaled and structured to provide career progression and mobility that attracts a professional work force to promote Army readiness and materiel needs in the 21st Century?
- What can the Army do to increase the resilience and assurance of supply in light of inconsistent procurements?

Research topic submissions will not only add to the existing knowledge base but will help the Army tackle present-day obstacles. Thank you for your input.
